

Cubit Users Basic Tutorial

When: Wednesday, April 12, 2006
Time: 8:30am – 4:30pm
Where: Building 980, Room 95
Cost: Free
Enroll: Contact Lydia Koch, lkkoch@sandia.gov or 284-1783

A one-day course in finite element mesh generation using Cubit software will be offered on Wednesday, April 12, 2006 at Sandia's New Mexico site. The course will introduce users to Cubit Version 10.1 and cover geometry cleanup and decomposition for meshing, mesh generation, mesh quality control, mesh export, and Cubit's newly developed graphical user interface.

The course is intended for new users of Cubit, and will describe the process for mesh generation from geometry creation to mesh export. This course will be similar to tutorials offered in the past.

A one-hour no-host lunch break will occur at noon.

NOTE: This will be a "Bring Your Own Computer" training course although a limited number of computers will be available for students who cannot bring a laptop to the class.

Please circulate to whomever may be interested!
